

**CONCEALED CONNECTION BOX**

VIEGA has developed a concealed connection box that offers enhanced aesthetic and functional value. The box

can be connected directly to supply and disposal pipes - only the connections for fittings and drain from washbasin need to be fitted. A chrome-plated veneer positioned over the drainage elbow covers the entire installation. The box is ideal for hot and cold drinking water connections, as well as the odour trap.

**RO WATER PURIFIER**

FABER's latest RO water purifier is designed in Italy and made in India. It uses Filmtec membranes and hence performs

in 3,000 ppm TDS limit. There is assurance of 100% RO water, while the Germblock technology protects the purified stored water from microbial

contamination. Copper guard and mineral addition technology filter add back essential minerals to the purified water. Here, copper acts as an anti-fouling agent and enhances the taste of water. The water purifier has a 9-litre storage capacity.
